

WSP STRATEGY SUBMISSION

Driving Pickup Point Adoption in Thailand

A FIVE-YEAR MARKETING STRATEGY FOR SHOPEE PICKUP POINTS

Sng Zhenhao

FOCUS THE US\$10M ON THAILAND TO CONVERT LATENT SPX INFRASTRUCTURE INTO MAINSTREAM BUYER PICKUP BEHAVIOUR

Before competitors lock in the retail-node logistics layer at Thailand's 14,545-store 7-Eleven network

01 · THE OPPORTUNITY

SEA pickup adoption sits at 9-14% vs 30-50% in mature Asian markets. Every 10% home-to-pickup shift unlocks

US\$25-40M

in annual regional logistics savings — payback within Year 1 at modest adoption lift

02 · THE PICK

THAILAND

- Fastest e-commerce CAGR in SEA (+22%)
- Nationwide SPX network already operating
- Verified gap: pickup is conditional and buried at checkout
- First-mover opportunity vs. Lazada

03 · THE STRATEGY

Three integrated pillars over 5 years

SURFACE	SUBSIDIZE	SOCIALIZE
\$1.5M 15%	\$3.0M 30%	\$4.0M 40%

Plus \$1M content production + \$0.5M measurement = \$10M total

04 · THE RETURN

4-6X ROI

Cumulative 5-year Thailand-only savings of US\$37-60M against US\$10M investment

Playbook portable to Malaysia, Vietnam in Years 3-5

PICKUP POINTS ARE SHOPEE'S LOWEST-COST COMPETITIVE MOAT IN SEA LAST-MILE LOGISTICS

Three structural advantages reinforce each other — lower cost, faster delivery, defensible position

01 COST ECONOMICS

15-22%

lower per-parcel delivery cost

- Reduces failed delivery by 60-70%
- Every 10% adoption shift unlocks \$25-40M annual savings regionally
- Compounds across SEA's 13.9B annual Shopee orders

02 SPEED ADVANTAGE

1 day

faster than home delivery

- Majority of pickup orders arrive sooner than scheduled home delivery
- Speed is the dimension Lazada is investing in heavily
- Pickup wins on BOTH speed and cost — rare combination

03 STRATEGIC POSITIONING

Lowest

cost competitive moat available

- TikTok Shop, Lazada, Shopee all compete on speed
- Pickup uniquely lowers cost while improving experience
- First-mover claims the position before commoditization

BUT SEA PICKUP ADOPTION SITS AT 9-14% — HALF THE LEVEL OF MATURE ASIAN MARKETS

Closing this gap is the highest-ROI marketing challenge in SEA last-mile logistics today

THE OPPORTUNITY

\$50-100M+

annual regional savings if SEA reaches 30% adoption

≈ 5-10x the entire \$10M proposed strategy investment

The 9-14% figure is the symptom, not the diagnosis. The strategic question:

- Where is adoption stalling in the funnel?
- Which market offers the best lever?
- What can \$10M actually fix?

Applied a five-criterion evaluation framework across all six Shopee SEA markets

Following the CALP discipline: Clarify, Assess, List, Prioritize — not jumping straight to the solution

CRITERION	WHY IT MATTERS FOR SPP
MARKET OPPORTUNITY	Bigger e-commerce GMV + faster growth = bigger absolute savings per adoption shift
LOGISTICS PAIN	Where doorstep delivery is hardest, pickup unit economics improve most
PARTNER INFRASTRUCTURE	\$IoM is marketing budget, not capex — pickup network must already exist
BEHAVIORAL READINESS	Existing 'go to CVS for non-shopping' habit lowers behavior-change cost
COMPETITIVE URGENCY	Markets where rivals are entrenching first carry higher cost of delay

Stars on the next slide are directional based on extracted evidence from e-Conomy SEA 2025, Sea 20-F FY2025, Parcel Perform 2024, and primary product testing — not a weighted formula.

Thailand emerges as the only market where the pickup gap matches the budget shape

Singapore and Vietnam eliminated; Indonesia, Philippines, Malaysia deprioritized; Thailand selected

Country	Market opportunity	Logistics pain	Partner infra	Behavioral readiness	Competitive urgency	Verdict
Indonesia	★★★★★	★★★★☆	★★★★★	★★☆☆☆	★★★★☆☆	Deprioritize — capex problem
Vietnam	★★★★☆	n/a	n/a	★★★★☆	★★★★☆☆	Eliminate — evidence too thin
Philippines	★★★☆☆	★★★★★	★★★☆☆	★★★☆☆	★★★★☆☆	Deprioritize — partner gap
Thailand	★★★★☆	★★★☆☆	★★★★☆	★★★★★	★★★★★	Desired market for Shopee to target
Malaysia	★★☆☆☆	★★★★☆	★★★☆☆	★★★★☆	★★★★☆☆	Deprioritize — small ceiling
Singapore	★☆☆☆☆	★☆☆☆☆	★★★★☆	n/a	★★☆☆☆	Eliminate — wrong battle

★★★★★ = highest tier · ☆☆☆☆☆ = lowest tier · 'n/a' = data not available in primary sources

Thailand is the only market scoring 4+ on both behavioural readiness and competitive urgency — meaning the consumer is ready AND the window is closing.

THAILAND IS THE ONLY SEA MARKET WHERE SHOPEE'S PICKUP GAP IS SOLVABLE WITH MARKETING ALONE

Three reinforcing legs to the argument — growth, infrastructure, and budget-shape fit

01

FASTEST GROWTH IN SEA

+22%

e-commerce CAGR (2025-2030)

GMV trajectory

\$33B → \$59B

Indonesia for comparison

+14% CAGR

Video commerce sellers

+175% YoY

02

LATENT INFRASTRUCTURE EXISTS

14,545

7-Eleven stores running nationwide;
SPEED-D parcel pickup available across

13,000+ branches

SPX service points

Nationwide network

SPEED-D partners today

Flash, Kerry, Post Sabuy

Required capex

≈ zero

03

GAP IS COMMERCIAL, NOT CAPITAL

\$10M

rightsized for marketing — not network
buildout

Indonesia would need

Displace 44k Alfamart+Indomaret

Philippines would need

Triple CVS partner network

Thailand needs

Marketing + UX + incentive

Thailand is the only market where the gap is 'make pickup visible and incentivize trial' rather than 'build pickup network'.

Mixed-methods research: industry data + primary product testing + competitive analysis

Triangulated qualitative product testing with quantitative industry reports (WSP Masterclass methodology)

01 · SECONDARY

Industry data

- e-Conomy SEA 2025 — country GMV, growth rates
- Sea Limited FY2025 Form 20-F — regional Shopee metrics
- Parcel Monitor SEA Logistics 2024 — country KPIs
- J&T Global Express FY2024 AR — SEA parcel volumes
- CP All Form 56-1 OneReport 2024 — 7-Eleven Thailand

02 · PRIMARY

Product testing

- Shopee TH checkout verified at shopee.co.th (June 2026)
- Lazada TH checkout verified at lazada.co.th
- SPX Thailand service-point locator mapped
- Tested Bangkok address (ICON SIAM)
- Multiple product categories tested for consistency

03 · COMPETITIVE

Landscape analysis

- J&T Singapore TikTok Shop case study (2023)
- Lazada Thailand newsroom — Thepharak, Priority Delivery
- Lotus's parcel-shipping partnerships
- TikTok Shop Thailand logistics: J&T + Flash
- Cross-referenced against e-Conomy regional benchmarks

Adoption fails at two specific stages: consideration (checkout invisibility) and trial conversion (no incentive)

MECE funnel decomposition — each stage maps to one of three strategy pillars

DIAGNOSIS

The fix isn't 'build infrastructure' or 'educate consumers from scratch'

It's three integrated moves:

- 1 Fix checkout visibility
- 2 Add a trial incentive
- 3 Drive discovery via creator marketing

Verified: Shopee TH has built SPX and offers pickup conditionally — but it is buried at checkout, not default

Primary product testing on shopee.co.th and lazada.co.th, June 2026; reconciled with Shopee TH Help Center [9]

INFRASTRUCTURE EXISTS

SPX THAILAND OPERATES NATIONWIDE SERVICE POINTS

BUT IT'S CONDITIONAL AND BURIED

TESTED JUNE 2026: PICKUP NOT OFFERED FOR THIS BANGKOK CART

Service-point locator confirms nationwide coverage (exact count not publicly disclosed) [8]

Pickup is restricted: max 5kg, value <฿2,000, no perishables/vouchers [9, 10] — most carts default to Standard Delivery

Lazada TH exhibits the same buried-pickup pattern (verified June 2026) — first-mover opportunity: surface pickup as default before competitors do.

Primary target: urban Gen Z (18-26) in Bangkok and major Thai cities

Highest TikTok reach + already at 7-Eleven daily + lowest behavior-change cost

PRIMARY TARGET

Urban Gen Z (18-26)

GEOGRAPHY

Bangkok, Chiang Mai, Phuket

MEDIAN BASKET

฿200-400 (low AOV)

DISCOVERY CHANNEL

TikTok primary, Shopee app secondary

7-ELEVEN HABIT

Daily (top-ups, payments, food)

SHIPPING SENSITIVITY

High — ฿29 = 15% of typical cart

WHY THIS TARGET

34M

Thai adults reachable via TikTok ad audience

52%

of Thai internet users reachable via TikTok

82%

discover Shopee features via social, not in-app

72%

of Gen Z prefer CVS pickup for privacy and flexibility

EXPLICITLY NOT TARGETING (YEAR 1)

- Suburban families — stable home delivery, low switch urgency
- Older non-Shopee-natives — high behavior-change cost
- Rural users — CVS density drops outside cities

Three integrated pillars over 5 years: Surface, Subsidize, Socialize

Each pillar maps directly to a diagnosed driver — together they convert latent infrastructure into mainstream behavior

01 · SURFACE	02 · SUBSIDIZE	03 · SOCIALIZE
MAKE PICKUP THE DEFAULT AT CHECKOUT WHAT Redesign checkout to surface pickup-first for users near SPX/7-Eleven points WHY Fixes the consideration-stage funnel break — the largest single drop-off BUDGET \$1.5M · 15% TIMING Year 1 heavy KPI Checkout pickup CTR	BUY THE FIRST THREE PICKUPS WHAT Free shipping on pickup orders <฿200 + escalating Shopee Coins reward on first 3 pickups WHY 65% of users say they'd switch 'if shipping were cheaper' — addresses this directly BUDGET \$3.0M · 30% TIMING Front-loaded Months 1-6 KPI First-to-3rd pickup conversion	REACH GEN Z WHERE THEY DISCOVER WHAT Mid-tier Thai TikTok creator partnerships across three use-case tracks: privacy, commute, gifting WHY 82% of Shopee feature discovery happens on social, not in-app — meet users at source BUDGET \$4.0M · 40% TIMING Years 1-2 heavy KPI TikTok hashtag engagement

PILLAR 1 · SURFACE: MAKE PICKUP THE VISIBLE DEFAULT FOR ELIGIBLE THAI BUYERS

Geofenced product redesign — users within 500m of an SPX or 7-Eleven point see pickup first

FIVE PRODUCT CHANGES

- 1 Pickup card surfaces first

When geolocated within 500m of an SPX/SPEED-D point
- 2 Savings stamp

'Save ฿29 with SPX Pickup' displayed prominently at decision moment
- 3 ETA comparison

'Ready tomorrow' (pickup) vs 'Thursday' (home) — pickup wins both speed and price
- 4 Map view + store photo

See exact 7-Eleven location, walking distance, store hours
- 5 One-tap favorite location

Makes 2nd and 3rd pickup frictionless — habit lock-in

WHY IT WORKS

- Removes 4 taps of friction (current: pickup buried in delivery dropdown)
- Surfaces savings AND speed advantage at decision moment
- Defaults are a proven choice-architecture lever; behavioural economics consistently shows material shifts in opt-in behaviour.

INVESTMENT

\$1.5M

over 5 years (15% of budget)

Year 1: \$1.2M (redesign, A/B tooling, geofence)

Years 2-5: \$0.3M (iteration + maintenance)

Pillar 2 · SUBSIDIZE: buy the first three pickups; behavior compounds organically after

Habit-formation economics: most behavioral repetition lock-in happens at the third successful use

HABIT-FORMATION CURVE

Front-loaded subsidy in Year 1 to fund habit formation; tapers as organic behavior compounds

MECHANICS

FREE

shipping on pickup orders <₱200 in Months 1-6

50

Shopee Coins bonus on 1st SPX pickup

75

Coins on 2nd pickup

100

Coins + voucher on 3rd pickup (habit anchor)

ANTI-ABUSE

Per-account cap · Friend-of-friend referral limits · Eligibility gated to first 3 pickups ever

Pillar 3 · SOCIALIZE: reach Thai Gen Z on TikTok via mid-tier creators across three creative tracks

Avoid generic 'convenient pickup' boilerplate — segment by use case for authentic conversion

34M

Thai adults reachable via TikTok ad audience

52%

of Thai internet users in TikTok ad reach

+175%

YoY growth in Thai video commerce sellers

THREE CREATIVE TRACKS

01

FOR WHAT'S JUST YOURS

INSIGHT

72% of Gen Z prefer CVS pickup for privacy

EXAMPLE COPY

'Discreet pickup at 7-Eleven for the things you don't want at home'

02

PICKUP ON THE WAY HOME

INSIGHT

47% prefer pickup near transit (MRT, BTS)

EXAMPLE COPY

'Get off the BTS at Asok, grab your order on the walk home'

03

SURPRISE DROPS

INSIGHT

Gifting / surprise use case opportunity

EXAMPLE COPY

'Send to the 7-Eleven near them — they don't know what's coming'

Mid-tier creators (50k-500k followers) over mega-influencers — 3-5x lower CPM with stronger niche engagement and higher conversion efficiency

Today, Shopee Thailand shows limited visible SPP marketing across app and social channels

Audited via primary product testing (Shopee app + web) and Shopee TH social channel review, June 2026

IN-APP MARKETING

PICKUP IS BURIED, NOT PROMOTED

- Pickup not surfaced at checkout (verified)
- No home-screen banner promoting SPP
- No push notifications encouraging pickup
- No SPP-specific promo bundles or coin rewards
- No in-app onboarding for pickup as a habit

SOCIAL MARKETING

GENERIC SHOPEE POSTS DOMINATE; NO SPP VOICE

- Shopee TH socials focus on sales (8.8, 9.9, payday), not pickup features
- No SPP-dedicated content series or hashtag
- No creator partnerships for pickup-specific content
- Competitor (SPEED-D at 7-Eleven) has stronger consumer messaging in TH
- Critical gap: 82% of feature discovery happens on social [16]

The biggest single addressable gap: 82% of users discover Shopee features on social, but SPP has no creator-led presence in Thailand. Pillar 3 directly closes this.

The single highest-impact change: surface pickup, comparable, and incentivized at the moment of decision

Visual example deliverable — based on the actual Shopee TH checkout tested in June 2026

FIVE PRODUCT CHANGES DRIVE THE LIFT

1. Pickup card surfaces first · 2. Savings stamp at decision moment · 3. ETA shows speed advantage · 4. Store photo + walking distance · 5. One-tap favorite for repeat use

Proposed TikTok creator content across three use-case tracks

Mid-tier Thai creators (50k-500k followers); branded hashtag amplifies UGC beyond paid partnerships

TRACK 01

FOR WHAT'S JUST YOURS

Privacy & flexibility — 72% of Gen Z value pickup for this

TRACK 02

PICKUP ON THE WAY HOME

Commute convenience — 47% prefer pickup near transit

TRACK 03

SURPRISE DROPS

Gifting use case — underused angle

Each track ladders to a distinct Gen Z use case. Creator brief specifies brand mention placement; #ShopeePickupTH UGC rewards drive organic reach beyond paid partnerships.

\$10M front-loaded into marketing and subsidy; tapers as habit compounds organically

Year totals: Y1 \$4.65M · Y2 \$2.40M · Y3 \$1.20M · Y4 \$1.00M · Y5 \$0.75M = \$10.0M over 5 years

Years 1-2 saturate behavior change;
Years 3-5 sustain at lower cost as
organic adoption takes over

PILLAR ALLOCATION

Socialize	\$4.0 M	40%
Subsidize	\$3.0 M	30%
Surface (UX)	\$1.5 M	15%
Content	\$1.0 M	10%
Measurement	\$0.5 M	5%
TOTAL	\$10.0 M	100%

Lift Thai pickup adoption from ~10% baseline to 35% by Year 5 — payback within Year 1

Cumulative 5-year savings of \$37-60M (Thailand only) vs. \$10M investment = 4-6x ROI

LEADING INDICATORS

TikTok hashtag engagement
5M views/mo by M6

Checkout pickup CTR
25% of eligible by EOY1

Geofence opt-in rate
70% of urban users

30-day repeat pickup rate
40% by EOY1 (habit indicator)

ATTRIBUTION METHODOLOGY

A/B holdout on UX · Matched-market test on creator marketing (BKK vs CMI) ·
Incrementality study on subsidy

ROI MATH

\$37-60M cumulative savings vs
\$10M spend = **4-6X ROI**

Four primary risks; each has a clear mitigation path

The most important risk is delay — every quarter raises the cost of competitor entrenchment

#	RISK	Likelihood	Impact	MITIGATION
1	CP All / 7-Eleven partnership stalls	Medium	High	SPX standalone service points scale independently; FamilyMart Thailand as backup (~700 stores)
2	Subsidy abuse / fraud	Medium	Medium	Per-account cap, friend-of-friend referral limits, eligibility gated to first 3 pickups ever
3	TikTok algorithm shift dilutes creator marketing	Medium	Medium	Diversify across Lemon8, Instagram Reels, YouTube Shorts; build owned channel via Shopee Live
4	Lazada matches first-mover move within 6 months	High	Medium	Speed-to-market matters more than secrecy; Year 1 claims position publicly via marketing, not tech moat

The biggest risk isn't any single item above — it's delay. Every quarter Shopee waits, Flash, Kerry, and Post Sabuy deepen 7-Eleven integration and Lazada accumulates pickup intent.

Year 1 = build the foundations; Year 3+ = port the proven playbook to adjacent markets

Thailand is the pilot, not the destination — designed for replication across SEA

YEAR 1 Jul 2026 - Jun 2027 FOUNDATIONS	YEAR 2 2027-28 SCALE THAILAND	YEAR 3 2028-29 LOCK-IN + EXPAND	YEAR 4 2029-30 MALAYSIA SCALE	YEAR 5 2030-31 VIETNAM LAUNCH
• Q1: Checkout UX redesign • Q2: Subsidy live in BKK + CM • Q3: Initial creator wave (50) • Q4: National scale	• Nationwide subsidy expand • 200+ creators • Adoption target: 20% • Habit formation measurement	• Reduce subsidy as habit compounds • Sustain creator program • Malaysia pilot launches • Build on existing partnership	• Malaysia full launch • Vietnam exploratory pilot • Thailand → 30% adoption • TikTok-heavy playbook ports	• Vietnam national rollout • Indonesia capability eval • Thailand → 35% adoption • Regional playbook proven
